Lockdown mode

Helps protect sensitive data from prompt-injection attacks by limiting features that can connect to the web or external services. [Learn more](#)

Developer mode

Developer mode ⓘ ELEVATED RISK

Allows you to add unverified connectors that could modify or erase data permanently. Use at your own risk. [Learn more](#)

Enforce CSP in developer mode

When enabled, dev mode apps without a declared CSP get the same restricted default CSP they would in production instead of unrestricted network access. [Learn more](#)
